

# SENCITY® Road

## Multifunction antenna

All communication standards for buses and trucks in a single product

Video surveillance and signal control, as well as passenger information, localisation and passenger counting systems represent the state-of-the-art in transport vehicles. Services such as satellite localisation, mobile communications (GSM, UMTS, LTE), WiFi, FM radio, as well as TETRA and DVB-T are used for this purpose.

HUBER+SUHNER offers a product platform that has been especially adapted to these applications and provides up to four antennas in one housing.
